

Security and Safety for Construction Sites and Heavy Industry

CAMACC Systems offers the most powerful and versatile video recording technology in the market today. Construction sites are almost never close enough to the board room for company leaders to know exactly what is going on at all times, whether that's to monitor work progress, comply with insurance and regulatory requirements, or protect assets from both external and internal threats.

CAMACC's advanced video surveillance solutions are exclusively designed for multiple locations and remote control and access. Our powerful cameras and world-class software help developers successfully manage a multitude of development operations – in real time. But CAMACC video surveillance offers much more than just cameras at the job site...

- Increase security and protect assets
- Prevent theft and vandalism
- Reduce insurance premiums
- Increase operational oversight remotely

Site Security

CAMACC provides cost-effective video systems to meet all your integrated security needs, whether you are concerned about the theft of tools, copper or appliances, or if you want video back-up for safety compliance, a record of incidents, or if you simply want remote access to view the progress of a site. Our systems include a multitude of connectivity devices, internet and network security, high definition cameras, surveillance workstations, video walls, video records storage arrays, and the most complex and secure access controls.

Our Focus Is Always On Customer Satisfaction

We give builders and developers the assurance and peace of mind that each project will be designed, executed, commissioned and tested, professionally, and safely, every time.

Stay On Top Of Your Job Sites, 24/7

CAMACC customers rely on our surveillance systems to securely and reliably connect operations across North America to corporate headquarters. Every development is different, and each presents different security risks. That's why CAMACC never takes a one-size-fits-all approach.

Get Ready To Be Surprised At What CAMACC Can Help You Do...

- Ultra-clear, high definition, video, day and night – the best on the market
- View video footage locally or remotely, from single sites to massive, multiple location developments in real time, significantly reducing site-to-site travel
- And much, much more – we love a challenge; what does your business need to succeed?

Features

- Much higher resolution image recording than elsewhere in the industry
- CAMACC DVRs are hybrid, allowing for simultaneous recording of both analog and high-definition, megapixel sources
- Expandable up to 32 channels per DVR (combined high-definition, megapixel and analog)
- Up to 20 megapixel, high-definition camera integration and support
- Enterprise management – health monitoring, system configurations, and user permissions
- Using VIGIL™ Central Management (VCM) software, the system is scalable and flexible (simultaneous management of unlimited CAMACC DVRs), and can be remotely managed
- Export to all media types – internal HD/DVD and external USB and NAS with unlimited storage
- Advanced Loitering/Dwell alarm – automatically triggered when people remain in a specified area for a set period of time
- Sweep log hardware/software to reduce insurance liabilities by tracking due diligence and supporting guard tour duties

“The CAMACC PTZ camera’s resolution is incredible! Together with Digital DVR we have an exceptional yard management system. And CAMACC’s service/support team has been with us every step!”

Jerry R. Byrd
