

Security and Safety for Retail Stores and Distribution Centers

CAMACC Systems offers the most powerful and versatile video recording technology in the market today.

Video surveillance is the cornerstone of retail security, whether you own a single store, or a retail chain with thousands of locations. But CAMACC's retail video surveillance offers much more than just cameras in stores...

- Increase security
- Reduce loss
- Mitigate liability
- Increase operational efficiency

Know Exactly What's Going On In Your Stores

CAMACC's core video solutions offer fully-integrated site management tools that enable seamless video monitoring, digital recording, and sophisticated video analysis by linking video with other information, including audio, Point-Of-Sale (POS), ATM, and other facility data.

For example, CAMACC allows you to run detailed queries on your POS transactions based on date, time, camera, transaction type, value, item code, cashier, or receipt number.

Get Ready To Be Surprised At What CAMACC Can Help You Do...

- Link specific ATM transactions to video footage
- Detect and deter cashier-related shrinkage by identifying the tell-tale patterns of POS exceptions like "sweet-hearting"
- Automatically count customers entering your store, and ping a floor manager when more clerks are needed
- Track and analyze movement and behavior to know where your customers predominantly turn, reach, and interact with merchandise
- Automatically track distribution center packaging or other process flow operations to ensure quality control and reduce down time
- View video footage locally or remotely, from single stores to massive, multiple locations, significantly reducing site-to-site travel
- And much, much more – we love a challenge; what does your retail business need to succeed?

"CAMACC's Digital Video Recorder meets the stringent requirements of London Drugs."

Wynne Powell

PRESIDENT
London Drugs

Features

- Much higher resolution image recording than elsewhere in the industry
- CAMACC DVRs are hybrid, allowing for simultaneous recording of both analog and high-definition, megapixel sources
- Expandable up to 32 channels per DVR (combined high-definition, megapixel and analog)
- Up to 20 megapixel, high-definition camera integration and support
- Enterprise management – health monitoring, system configurations, and user permissions
- Using VIGIL™ Central Management (VCM) software, the system is scalable and flexible (simultaneous management of unlimited CAMACC DVRs), and can be remotely managed
- Export to all media types – internal HD/DVD and external USB and NAS with unlimited storage
- Sweep log hardware/software to reduce risk, liability and insurance costs by tracking due diligence and supporting guard tour duties
- Comprehensive POS and ATM integration – database integration with query and reporting engine

"Golf Town has grown to become Canada's golf superstore, with 56 stores averaging over 18,000 square feet. Starting in 2007 thru to the present, Golftown uses CAMACC's high definition DVR technology in our stores."

Scott Byers

DIRECTOR OF LOSS PREVENTION
Golf Town/Golfsmith
