

Security and Safety for Casinos and Gaming

CAMACC Systems offers the most powerful and versatile video recording technology in the market today.

Video surveillance is the cornerstone of retail security, whether you own a single store, or a retail chain with thousands of locations. But CAMACC's retail video surveillance offers much more than just cameras in stores...

- Increase security
- Reduce loss
- Mitigate liability
- Increase operational efficiency

Storage No Longer An Issue

Megapixel IP cameras produce excellent detailed images, but the size of the video files produced are 10 to 100 times the size of standard security video files, which means image storage quickly becomes an issue. Aztech is a special video codec developed by CAMACC's software engineers to recompress huge files down to the size of standard security video, and yet maintain the detail, resolution and quality of the megapixel camera. This makes megapixel images a reality without enormous investment in storage and maintenance.

Know Exactly What's Going On In Your Casinos

CAMACC's core video solutions offer fully-integrated site management tools that enable seamless video monitoring, digital recording, and sophisticated video analysis by linking video with other information, including audio, Point-Of-Sale (POS), ATM, and other facility data.

Get ready to be surprised at what CAMACC can help you do...

- See the pips and chips – incredibly detailed megapixel technology
- Hot Swap DVR – insures constant monitoring with immediate failsafe of recorded signals routed to another DVR in the event of hardware failure
- Automatically count customers entering your store, and ping a floor manager when more staff are needed
- Track and analyze movement and behavior to know where your customers predominantly turn, reach, and interact with merchandise
- View video footage locally or remotely, from single tables to the entire floor
- And much, much more – we love a challenge; what does your casino need to succeed?

Features

- Much higher resolution image recording than elsewhere in the industry
- CAMACC DVRs are hybrid, allowing for simultaneous recording of both analog and high-definition, megapixel sources
- Expandable up to 32 channels per DVR (combined high-definition, megapixel and analog)
- Up to 20 megapixel, high-definition camera integration and support
- Enterprise management – health monitoring, system configurations, and user permissions
- CAMACC's Gatekeeper system is an IP-based Network Video Matrix Switch that can support an unlimited number of monitors, cameras and client station connections
- Using VIGIL™ Central Management (VCM) software, the system is scalable and flexible (simultaneous management of unlimited CAMACC DVRs), and can be remotely managed
- Export to all media types – internal HD/DVD and external USB and NAS with unlimited storage
- Advanced Loitering/Dwell alarm – automatically triggered when people remain in a specified area for a set period of time
- Sweep log hardware/software to reduce insurance liabilities by tracking due diligence
- Comprehensive POS and ATM integration – database integration with query and reporting engine

Safety First!

CAMACC is annually compliant with PICS auditing, ISNetwork, and is P.O.S.T. certified.
