

# Security and Safety for Grocery Stores and Distribution Centers

CAMACC Systems offers the most powerful and versatile video recording technology in the market today. Ever-thinning margins in the grocery sector mean that loss prevention, food security, and liability insurance are ever more important issues to solve, whether you own a single store, or a grocery chain with thousands of locations. But CAMACC video surveillance offers much more than just cameras in the produce aisles...

- Reduce loss and shrinkage
- Reduce liability insurance and claims costs
- Prevent food tampering
- Increase operational efficiency

Loss prevention is only the beginning with CAMACC's sophisticated high-definition video hardware and integrated software. Grocery managers can expect reduction in shrinkage, naturally, but also decreased liability and insurance and claims costs.

## Slip-And-Fall Claims

Over 9 million disabling slip/fall injuries occur annually, with an average cost per slip/fall accident exceeding \$20,000! CAMACC's VIGIL™ sweep log helps businesses achieve dramatic reductions in liability insurance and claims costs as a result of adhering to a prescribed floor maintenance program supported with a digital video verification and keypad-based event auditing system. CAMACC's VIGIL™ sweep log is a stand-alone software application that provides 24/7-365 activity monitoring, including automated alerts that warn of any potential store policy violations that might result in an unsafe environment for employees or customers. The application is easily programmed and administered at the corporate level, yet provides local store managers the ability to view floor activity as well as run reports at the store level.

## Know Exactly What Is Going On In Your Grocery Stores

CAMACC's core video solutions offer fully-integrated site management tools that enable seamless video monitoring, digital recording, and sophisticated video analysis by linking video with other information, including audio, Point-Of-Sale (POS), ATM, and other facility data.

For example, CAMACC allows you to run detailed queries on your POS transactions based on date, time, camera, transaction type, value, item code, cashier, or receipt number.

## Get Ready To Be Surprised At What CAMACC Can Help You Do...

- Protect against slip and fall claims and to reduce liability claims and insurance costs
- Guard against food tampering
- Detect and deter cashier-related shrinkage by identifying the tell-tale patterns of POS exceptions like "sweet-hearting"
- Link specific POS transactions to video footage
- Economically use the same security DVR tools to gather key marketing data and customer analytics
- Queue reporting – automatically count customers entering your store, and ping a floor manager when more clerks are needed
- Heat mapping to track and analyze movement and behavior to know where your customers predominantly turn, reach, and interact with merchandise
- Automatically track distribution center packaging or other process flow operations to ensure quality control and reduce down time
- View video footage locally or remotely, from single stores to massive, multiple locations, significantly reducing site-to-site travel
- And much, much more – we love a challenge; what does your grocery business need to succeed?

# Features

- Much higher resolution image recording than elsewhere in the industry
- CAMACC DVRs are hybrid, allowing for simultaneous recording of both analog and high-definition, megapixel sources
- Expandable up to 32 channels per DVR (combined high-definition, megapixel and analog)
- Up to 20 megapixel, high-definition camera integration and support
- Enterprise management – health monitoring, system configurations, and user permissions
- Using VIGIL™ Central Management (VCM) software, the system is scalable and flexible (simultaneous management of unlimited CAMACC DVRs), and can be remotely managed
- Export to all media types – internal HD/DVD and external USB and NAS with unlimited storage
- Sweep log hardware/software to reduce insurance liabilities by tracking due diligence
- Comprehensive POS and ATM integration – database integration with query and reporting engine

*"CAMACC really gets it. They understand the needs of the big, national players as well as the needs of the smaller corporate operations."*

**Keith Colonval**

DIRECTOR, RESOURCE PROTECTION DEPARTMENT  
*Overwaitea Food Group*

## Safety first!

CAMACC is annually compliant with PICS auditing, ISNetwork, and is P.O.S.T. certified.
