

Security and Safety for Hotels and Restaurants

Hospitality is about delivering an exceptional customer experience in a relaxing, safe, and secure environment. At CAMACC we understand that providing guests with great service and a wonderful experience, while at the same time managing security and liability concerns, is more than a little tricky!

Peace Of Mind

A carefully-designed video surveillance system gives guests peace of mind. Same for the owners, because it helps you increase return business and remain competitive in an aggressive market.

Security – video surveillance helps keep guests safe from theft and other criminal activity by helping track visitors and prevent break-ins on hotel property.

Prevent theft – security cameras can help keep intruders out of exclusive hotel areas like swimming pools and gyms where theft is common. A surveillance system in the storeroom and other maintenance areas can uncover employee theft.

Stop food service and bar shrinkage – video surveillance in the dining room, kitchen and bar areas dramatically reduces loss of food and alcohol as well as linen supplies and flatware. Monitoring Point-of-Sale areas with a fixed-camera equipped with audio allows owners to see cash transactions as well as hear what is happening.

Customer service – being able to watch and listen to employee interaction with guests is an excellent tool for ongoing customer service training.

Remote monitoring – CAMACC's digital video recorders allow you to access live or recorded surveillance pictures over the internet, from any location in the world.

Intelligent Video

The powerful combination of CAMACC's clear megapixel images with intelligent software will give deep insight to more effectively manage your business – in real time –through optimizing staffing levels, evaluating employee performance across different business locations, improving customer service, and ultimately increasing business profitability.

Protect Yourself From Liability Issues

Sweep Log is a stand-alone software application that provides 24/7-365 activity monitoring, including automated alerts that warn of any potential store policy violations that might result in an unsafe environment for employees or customers.

Know Exactly What's Going On In Your Business

CAMACC's core video solutions offer fully-integrated site management tools that enable seamless video monitoring, digital recording, and sophisticated video analysis by linking video with other information, including audio, Point-Of-Sale (POS), ATM, and other facility data.

Features

- Much higher resolution image recording than elsewhere in the industry
- CAMACC DVRs are hybrid, allowing for simultaneous recording of both analog and high-definition, megapixel sources
- Expandable up to 32 channels per DVR (combined high-definition, megapixel and analog)
- Up to 20 megapixel, high-definition camera integration and support
- Enterprise management – health monitoring, system configurations, and user permissions
- Using VIGIL™ Central Management (VCM) software, the system is scalable and flexible (simultaneous management of unlimited CAMACC DVRs), and can be remotely managed
- Export to all media types – internal HD/DVD and external USB and NAS with unlimited storage
- Sweep log hardware/software to reduce risk, liability and insurance costs by tracking due diligence and supporting guard tour duties
- Comprehensive POS and ATM integration – database integration with query and reporting engine

Safety First!

CAMACC is annually compliant with PICS auditing, ISNetworld, and is P.O.S.T. certified.
